The GBV program faced challenges in the implementation during the last quarter of the year; the civil unrest, instable security situation and the road blockages hindered the access of women and adolescent girls to the safe spaces across the country, brought to a partial interruption of some GBV activities (i.e: GBV risk mitigation and community initiatives) and affected the target reached. However, UNICEF and its partners continued to provide the case management services for GBV survivors through the hotline which were available 24/7. The internal political challenges in the Ministry of Social Affairs delayed the “timely” issuance of a clearance that allow some GBV partners to continue service provision in some Social Development Centre (SDCs); this affected the target reached. UNICEF followed up closely with MOSA to ensure the issuing of the clearance and with partners to use the mobile approach to reach of women and girls during the time (though at a smaller scale).
